

Evacuation Zones in Kenedy County

The evacuation map for Kenedy County was developed by Emergency Management and Public Safety officials as part of the Coastal Bend Hurricane Evacuation Study with the assistance of the Texas A&M Transportation Institute and Texas A&M Hazard Reduction & Recovery Center. January, 2020. This map is available at: <http://hrrc.arch.tamu.edu/research/HES/>

IMPORTANT: Considering the vulnerable nature of manufactured homes (such as mobile homes, RVs, & trailers) for all levels of hurricane winds, it is strongly recommended that all residents of manufactured homes in Kenedy County evacuate and seek safer shelters regardless of their locations whenever voluntary or mandatory evacuations are declared for these counties.
