

The Master of Architecture career change program at Texas A&M University teaches you to think like an architect. During this fast-paced program, you'll leverage your unique background as you dive into the architectural discipline.

After completing this program, you will enter the professional Master of Architecture program that will prepare you to become a licensed architect.

ABOUT THE PROGRAM

The career change program is designed for students with non-architecture related degrees who wish to pursue architecture. Our intensive introductory curriculum teaches foundational architectural knowledge over the course of four semesters (two summer semesters and two long semesters).

Students who successfully complete the program will begin the Master of Architecture curriculum.

CAREERS

The Master of Architecture program provides graduates with the required educational background to enter the professional practice of architecture. Students who wish to become a licensed architect must gain professional experience and pass a licensing examination.

Other career directions include: Design and fabrication, Development, real-estate and construction, Community planning and city planning, Government and social work, Teaching, and research and scholarly pursuits.

AREAS OF EMPHASIS

- Facility management
- Health and systems design
- Historic preservation
- Sustainable urbanism

CURRICULUM

The career change program requires 41 hours of class credit. It's completed over the course of a 3-week summer introduction course, and a fall, spring, and summer semester.
