

The COA has been working on updating our Strategic Plan. For this updated 2025-30 version, our focus is on adding the implementation plans and action items with milestones. Revisions to the main contents are limited to minor wording changes and merging Partnership and Community into a single pillar. A more extensive update/process will be carried out in the subsequent version. We welcome all COA faculty, students, and staff to come and join our information session to share feedback on those proposed changes/additions to the slogan, mission statement, pillars, specific goals, as well as the Implementation Plan, which includes specific strategies, measures, and milestones.
